

**Gustavo Leão**

Brasil

Gustavo was diagnosed with epilepsy at age 8 and has experienced social stigma.

**What can we do to  
reduce stigma?**

“

Through public policies  
and encouragement to  
speak naturally about  
epilepsy.

”

**International  
Epilepsy Day**

“

I want more people to talk  
about epilepsy in the world.  
We promote the topic through  
art and sport.

”
